### Clinical Services

Dozens of clinical specialty services are available over the Arizona Telemedicine Program network from a variety of member providers. Teleradiology, teledermatology, and tele-behavioral health are the most common specialties provided through the network. [\(more...\)](#)

### Network

The Arizona Telemedicine Program (ATP) network is primarily devoted to improving access to specialized medical care throughout the State of Arizona through the use of telemedicine technologies such as digital imaging and real-time video conferencing. [\(more...\)](#)

### Training

The Arizona Telemedicine Program offers regular comprehensive telemedicine and telehealth training course in both Phoenix and Tucson. Training is free to Arizona residents. [\(more...\)](#)

### Distance Education

The Arizona Telemedicine Program offers many distance education opportunities for member sites. These include numerous grand rounds in a variety of disciplines. Programs can be viewed "live" via interactive videoconferencing. [\(more...\)](#)

## Services

The SWTRC provides teaching, support and mentoring activities with the following outreach tools:

### Training Program: One-Day and Two-Day Courses

The one-day conference is designed to provide an overview of telemedicine, while the two-day conference provides more application specific lectures and more hands-on opportunities for participants to interact and use various telemedicine technologies and equipment. See side bar at left for a list of the key topics covered. Also, for more information, visit: [www.telemedicine.arizona.edu/training.cfm](http://www.telemedicine.arizona.edu/training.cfm)

### Webinars

The above Training Course lectures will be available as webinars.

### Toolkit Development & Dissemination

A variety of telehealth toolkits have been developed by the various Telehealth Resource Centers and are available at [www.telehealthresourcecenter.org](http://www.telehealthresourcecenter.org)

### Help Desk

The Help Desk has mechanisms in place for both urgent and non-urgent support requests and covers a variety of application areas such as general technical, network, computer, teleradiology, teletrauma and videoconferencing. It can be accessed at [www.telemedicine.arizona.edu/help\\_desk.cfm](http://www.telemedicine.arizona.edu/help_desk.cfm)
